

## ***Planner Use Cases***

### **Use Case 1 : Find venues for the event**

- \*Customer tells the preferences to planner
- \*Planner search for indoor or outdoor venues based on customer's preferences
- \*Book the venue

### **Use Case 2 : Schedules the event**

- \*Customers give the date and time when they want to do the event
- \*If venue is free in that time it schedules automatically

### **Use Case 3 : The venue is not free in the requested time**

- \*System shows an error and requests customer to enter a different date or time

### **Use Case 4 : Suggests businesses for customers**

- \*If customers don't have any ideas for businesses such as restaurant, hairstylist, photograph etc., planners will give them suggestions based on the reviews that people have made for the businesses that we collaborate with.

### **Use Case 5 : Organize the guests**

- \*Plans where they will seat by accessing the venue from the platform
- \*Prepares guest lists

### **Use Case 6 : Table doesn't fit all guests customer wants to put in**

- \*System generates an error and tells customer that the table is full and requests to put the person in another table
